Welcome to Intense Lighting Anaheim, California

INTENSE LIGHTING, a Leviton company since 2015, is a solutions-based manufacturer of award-winning, sustainable lighting products. The company offers a wide variety of innovative energy efficient luminaires for the commercial, hospitality, retail and residential markets. Customers can select from an expansive portfolio that includes downlighting, track, recessed multiples and other specialty products.

A Leviton Lighting Brand

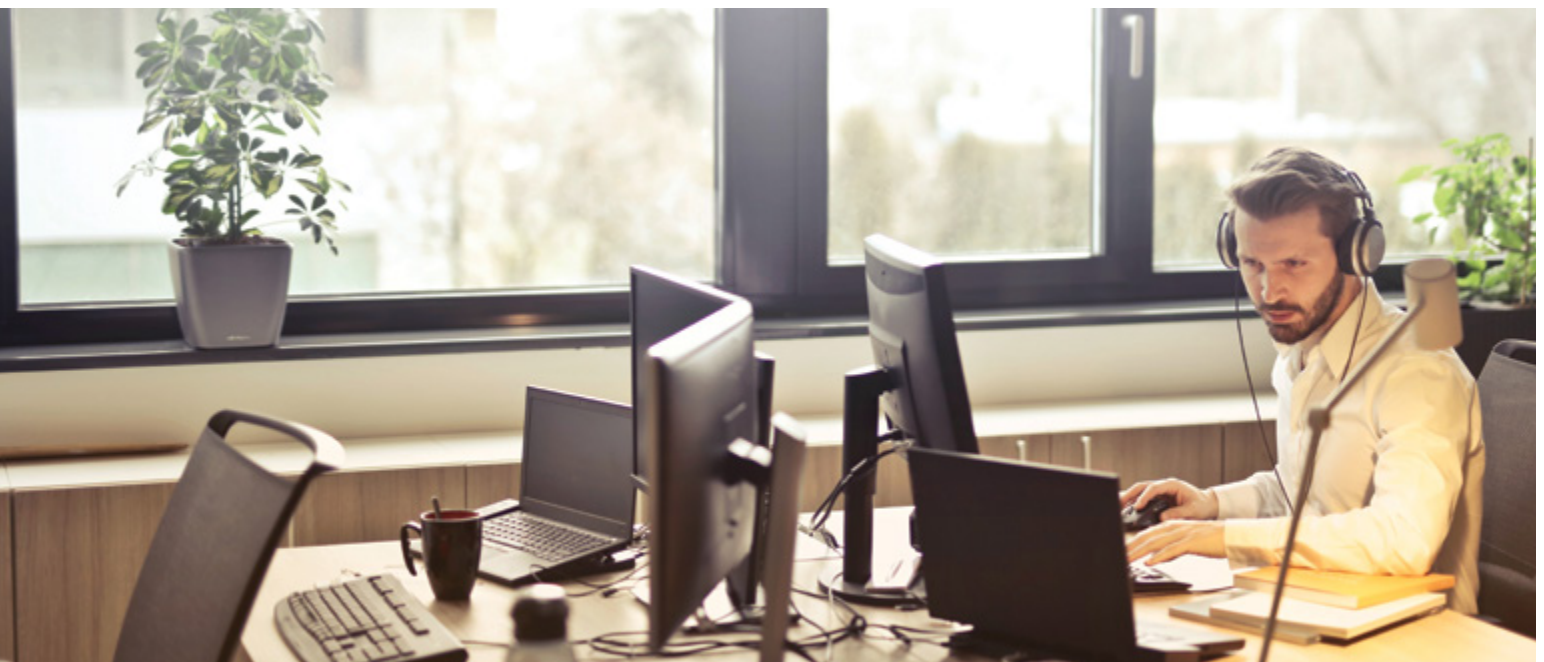

Rapid Prototyping & In-House Photometry Lab

State of The Art Manufacturing Facility

156,000 sq/ft Facility

Prompt In-House Customer Service | No Charge Sample Policy

The Center

Light & Technology

Experience The Center

The Center redefines the showroom experience and exhibits light and technology like never before! Located at the Leviton Lighting Anaheim, CA facility, the immersive 6,000 square foot state-of-the-art interactive training and education facility serves as the ultimate venue and resource for lighting professionals not only in Southern California but across the country.

Showcasing the perfect synergy between Intense and Birchwood luminaires with Leviton controls, The Center invites designers, architects and the lighting community to experience emerging LED technologies and smart intuitive controls in true-to-life settings.

Leviton Solutions

The Center features a fully immersive showroom designed for education and hands on demonstration. Equipped with cutting-edge multimedia enabled conference rooms, the space is ideal for product training and educational seminars designed to further knowledge on topics ranging from challenges in lighting design to Title 24 code compliance.

Mounting Options

Surface Post Mount
V-Rail surface post mount was designed to install on a level surface and is ideal for new installations or retrofits.

Embedded Mount
V-Rail embedded mount is recommended for installations with ramps or angled surfaces.

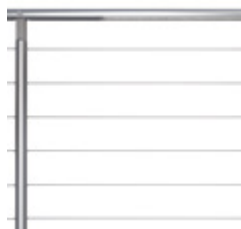

Wall Mount (RPS Only)
V-Rail wall mount is secured by anchors and is ideal for installations when vertical surface is present.

Custom Mount
V-Rail can be custom fit to your existing mounting method in the field. Consult factory.

Infill Options
