

# I4

## 4" Line Voltage Housing Non-IC New Construction

### Product Specifications

**Description:**

The I4 recessed down light can be used for either commercial or residential new construction applications. For use in non-insulated ceilings. Must be kept at least 3" away from insulation.

**Lamp:**

50W 20PAR max.

**Socket:**

E26 Medium base socket

**Socket Plate:**

Adjustable socket plate adjusts and locks in position without tools for multiple lamp and trim types.

**Installation:**

Includes adjustable hanger bars (14"-25") with integral nail. Bar hangers can be repositioned 90° without tools. Barhangers can be locked into place with locking screws.

**Junction Box:**

Galvanized steel junction box with 1/2" and romex wiring knockouts, with removable access plates for easy installation.

**Thermal Protector:**

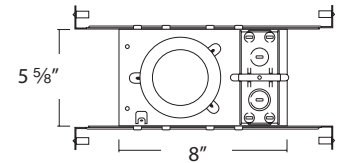

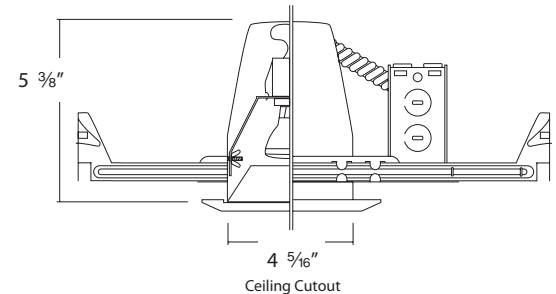

Integral thermal protector protects against improper lamping and insulation proximity.

**Labels:**

- NRTL listed for through-branch wiring and damp locations. (See trim for wet location listing).
- NRTL listed to US and Canadian safety standards.
