Descriptions:

The mini LED step light wall mounts directly to a standard rectangular (single gang) junction box. Suitable for either new construction or remodeling projects.

Features:

- Driver integral to LED board. 120V input
- Consist of 12 LEDs
- Multiple louver options
- Indoor/outdoor applications
- 1.8W LED 3500K/6000K
- NRTL wet location listed with outdoor back box

Face Plate:

316 Stainless Steel: Stainless steel with sealed gasket ideal for harsh environments for both indoor and outdoor applications.

Cast Aluminum: Standard black or white powder coat finish for both outdoor and indoor applications. Other color or aluminum anodized finishes available with minimum order required, consult factory.

Lens:

Frosted white acrylic lens standard.

Back Box:

Outdoor: Single gang die-cast aluminum with water tight connector for NRTL wet location listed and meets IP65 requirements.
Indoor: Single gang injection molded plastic.

Electrical:

120V input voltage. Fixture is fully gasketed.

Maintenance:

Stainless steel requires regular cleaning and maintenance to prevent tarnishing or tea staining.

Listing:

NRTL listed for wet locations. NRTL listed to US and Canadian standards.
