

Installation Instructions

4" Gravity Shallow Downlight (For use with IHOL-S4D & GDS4D)

IS-R1061R4

1 of 5

⚠ WARNING

Risk of electrical shock. Disconnect power before servicing or installing luminaire.

⚠ WARNING

Risk of injury or damage. Luminaire will fail if not installed properly. Follow installation instructions.

⚠ WARNING

Risk of injury. Wear safety glasses and gloves during installation and servicing. Allow ample time to cool before handling.

IMPORTANT SAFETY INSTRUCTIONS

- Read all installation instructions before installing. It is important to save these instructions.
- Only install and connect LED module with power disconnected at the circuit breaker. Hot plugging, or connecting the module with power on, could damage the LEDs and is not covered by warranty.
- Connectors on modules and approved housings are keyed for specific voltage combinations; do not force or attempt to bypass connectors.
- Observe and follow all label information and instructions regarding dry, damp and wet location listings, proper Intense LED module, warnings of installation near combustible materials and/or insulation.
- Turn off power at circuit breaker before attempting to install or perform maintenance on the fixtures.
- Be sure to connect ground wire to prevent electric shock or other potential hazards.
- The product must be installed in a manner consistent with the intended use and in compliance with the national electrical codes and local codes by a person familiar with the construction and operation of the product and the hazards involved.
- Do not block the trim aperture as this may cause unsafe operating conditions.
- **WARNING: RISK OF FIRE.** Non-IC fixture requires that insulation must be kept at least 3" away from all sides of the fixture. Minimum of 90°C supply conductors. Consult a qualified electrician before installation.

WARNING: Use only Intense Lighting trims listed for use with this fixture. Use of trims other than those listed by Intense Lighting is a violation of N.E.C 110-3(B) and voids all warranties.

HOUSING INSTALLATION:

1. Cut out the ceiling hole to 5 1/4" diameter.
2. Mount fixture housing according to ceiling type.
 - Universal mounting bracket has slot openings for C-channel, flat bar, and 1/2" EMT; secure to joist or grid using fasteners or wire. C-channel hangers are recommended for T-Bar ceilings, install with notches facing down to engage T-Bar grid.

MOUNTING:

Bar hanger mounting brackets offer several height choices depending on installation requirements. C-Channel, EMT (supplied by others) and other joist bars can be ordered for various ceiling types.

WIRING

NOTE: For limited plenum space, use knockouts on the sides of the junction box

ELECTRICAL CONNECTIONS:

1. Make electrical connections through desired knockout for conduit, MC and Romex® cable. Use only UL listed connectors (supplied by others).
2. Connect ground from fixture to green (GROUND) supply wire, white wire from fixture to white (NEUTRAL) supply wire and black wire from fixture to black (HOT) supply wire. Use UL listed connectors or wire nuts to make the connections (supplied by others). Connect dimming wires if applicable, see page 4.
3. Close and lock junction box door ensuring all wire connections and wires are contained within.

HOUSING HEIGHT ADJUSTMENT:

1. To ensure the housing sits flush with the top of the ceiling, remove optic from the fixture by turning the optic counter clockwise.
2. Move the sliding mechanism by using thumb tabs to slide heat sink assembly aside.
3. Loosen (2) wing nuts to make adjustments so that the housing frame is against the top of the ceiling. After housing adjustment, tighten wing nuts in place.
4. Use thumb tab to slide heat sink assembly back in place.

NOTE: Avoid contact with LED, may damage light source

COLLAR HEIGHT ADJUSTMENT:

Loosen (4) thumb knobs on collar to make adjustments so that the housing collar is flush with the ceiling line. The collar will accommodate ceiling thicknesses from $\frac{5}{8}$ " to $1\frac{1}{4}$ ". After adjusting collar, lock thumb knobs in place.

REPLACE OPTIC:

1. Replace optic by aligning (3) optic slots to (3) base tabs.
2. Insert optic slots into tabs and twist clockwise.

NOTE: Avoid contact with LED, may damage light source

PLENUM COVER:

Install plenum cover to prevent damage to the fixture during construction.

TRIM INSTALLATION:

1. Align spring clips on trim to collar notch
2. Push trim fully against housing to ensure the trim is flush to the ceiling.
3. Once all fixtures have been installed, power at the breaker can be restored

SERVICING:

1. Remove trim from the housing.
2. Remove optic from the fixture by turning the optic counter clockwise.
3. Move the sliding mechanism by using thumb tabs to slide heat sink assembly aside.
4. Push the spring clip on the junction box and tilt out driver from behind bottom housing tabs.
5. Disconnect 2-pin connector from driver.
6. Insert driver plate base behind bottom housing tabs before snapping plate back into spring clip.

ACCESSORY HOLDER:

Note: Accessory holder can accommodate up to two accessories

1. Install accessories into accessory holder and replace accessory holder's retaining ring.
2. Push accessory holder against optic until accessory snaps onto optic.

WIRING & DIMMING COMPATIBILITY

For use with all Intense Lighting product with supported dimming options.
Please check configuration of product for correct dimming protocol.
